# A Guide to *MP* Volume 37
# 1998 Subject Index

This is an alphabetical list of primary topics included in Volume 37 of *MP*. Subject classifications are followed by issue number, then page number. An alphabetized list of authors appears on p. 72.

**ACIDS**
***See also* HYDROGEN SULFIDE: SOUR SERVICE**
Applications in gas cleaning sections, 3-61
Cleaning, temperature control of, 4-59
Corrosion
control methods in amine systems containing $H_2SO_4$, 1-42
of Ta and alloys in highly concentrated $H_2SO_4$, 1-52
rate measurement, 1-35
FRP applications in, 3-61

**ADHESIVES**
Conductive, for CP, 1-12

**ALUMINUM AND ALLOYS**
Aluminized steel tubes and pipes, 7-65
Embrittlement of Al plate heat exchanger, 6-59

**ANODES**
***See also* CATHODIC PROTECTION**
Consumption on a subsea x-mas tree, 9-17
Continuous impressed current, in high-resistivity soil, 6-18
Impressed current tensioned strings, 4-19
Sacrificial, protection of an underground steel reinforced structure, 3-10
Zn sheet, with conductive adhesive, 1-12

**ATMOSPHERIC CORROSION**
Atmospheric corrosiveness maps, 12-48
Corrosion mapping in a galvanizing process atmosphere, 12-26
Galvanic, of metals in a tropical climate, 9-55

**BACTERIA**
***See* MICROBIAL ATTACK**

**BIOCIDES**
***See also* WATER TREATMENT**
Biofouling control in water treatment applications, 7-50
Cooling water, for control of biofilms, 10-50
Effect of MCMI on bacterial respiration in cooling water, 8-54
Freeze-proofing, 9-44

**BOILERS**
Fluidized, erosion-resistant coatings for, 2-38

**CATHODIC PROTECTION**
***See also* ANODES**
Alternating current interference-related explosions in piping, 8-17
Anode consumption on a subsea X-Mas tree, 9-17
Close interval potential surveys, 2-16
Continuous impressed anodes in high-resistivity soil, 6-18
Coupons and probes, use of, 8-24
Coupons, use of in monitoring an underground pipeline, 2-23
$Cu/CuSO_4$ reference electrodes, influences on, 5-24
Evaluation probes for hot asphalt storage tanks, 12-21
Ice shields on the Northumberland Strait Confederation Bridge, CP of, 10-27
Impressed current
for coastal Oregon bridges, cost of, 7-22
tensioned anode string system for offshore structures, 4-19
Intermittent protection with solar power, 12-14
Method for a corvette-type ship, 7-17
Pipeline rehabilitation, 1-17
Polarization under disbonded coatings, 5-17
Prestressed concrete pipe, criteria for, 11-14
Reinforced concrete structures in aggressive environments, CP of, 10-19
Sacrificial anode protection of concrete structures, 3-10
Steel-reinforced concrete seawater intake structure, 6-11
Tank bottom corrosion, 9-20
Technology for offshore structures, 3-15
Upgrade of the Cognac Platform, 4-13
Zn sheet anodes with conductive adhesive, 1-12

**CERAMICS**
Corrosion performance of in slagging environments, 9-28

**CHEMICAL TREATMENT**
Biocide for biofouling control in water treatment, 7-50
Biofilms, control of, 10-50
Biological influences on hydrogen effects in steel in seawater, 4-40
Cooling water services, outsourcing of, 6-41
Corrosion
control methods in amine systems containing $H_2S$, 1-42
flow-induced, 3-38
rate measurement technique, 1-35
Dehumidification and vapor corrosion inhibitors, use of, 8-48
Effect of MCMI on bacterial respiration in cooling water, 8-54
Failure investigation of a potable water main pipeline, 11-47
Freeze-proofing biocides, 9-44
Green chemistry corrosion and scale inhibitors, 12-42
Imitating natural microbial fouling control, 4-45
Microbiologically influenced corrosion in fire protection systems, 7-45
On-line monitoring to solve bacterial corrosion problems, 2-61
Paraffin deposits, removal of, 9-49
Particulate interference and treatment, 3-46
Prediction models to establish coal-bed methane wells treatment protocol, 2-71
Scale initiation and growth, electrochemical aspects, 5-50
Silica scale control, 11-41
Sulfate-reducing bacteria, possible source of phosphorous compound, 5-46
Sulfonated polymers, 10-56
Water quality in S. Louisiana, two field cases, 6-46
Water reuse for electric utility and cogeneration plants, 12-37

**CHLORIDES**
Chloride-induced corrosion of reinforcing steel, 5-32

**COATINGS**
Advanced lining systems for chemical environments, 8-35
Application and evaluation for pipeline, 2-44
Ceramic materials, corrosion performance of, 9-28
Coated steel, filiform corrosion of, 3-67
Concrete containment structures in a power plant, 6-33
Construction coating work, cost considerations of, 11-25
Corrosion mapping in a galvanizing process atmosphere, 12-26
Cryongenic testing of, 3-28
Disbonded, polarization under, 5-17
Effect of, on rebar corrosion, 5-32
Erosion-resistant, for fluidized bed boilers, 2-38
Internal pipeline rehabilitation, 3-24
Internal, selection for gas well tubulars, 4-28
Metal arc spray technology for munitions, 11-32
Metallic thermal spray evaluation, oil and gas service, 7-34
Moisture-cure urethanes, 12-32
Monolithic flooring systems, 8-41
Pipe liners for high-temperature oil and gas applications, 9-34
Plastic composites, 1-25
Polyethelene, 3-layer, 6-28
Rubber lining, material specification, 7-31
Surface preparation, ultrahigh-pressure water jetting, 5-39
System for a cold-weather bridge, 10-43
Thermal arc spray systems, 10-37

**COMPOSITES**
***See also* POLYMERICS**
Fiberglass reiforced, for $H_2SO_4$ plants, 3-61
Thermoplastic-lined FRP dual laminate, 1-25

**CONCRETE**
Choosing a monolithic flooring system, 8-41
Coating containment structures in a power plant, 6-33
Corrosion mapping in a galvanizing process atmosphere, 12-26
Diagnosing reinforced structures, 10-69
Intermittent protection with solar power, 12-14
New reinforced concrete structures, CP of, 10-19
Prestressed pipe, CP of, 11-14
Probability model of steel corrosion, 10-64
Rebar corrosion, effect of inhibitors and coatings on, 5-32
Steel-reinforced, seawater intake structure, CP protection of, 6-11
Steel-reinforced structure, CP protection of, 3-10

**COPPER AND ALLOYS**
Erosion-corrosion of, by domestic waters, 11-57
Pitting of, caused by well water, 11-61

**CREVICE CORROSION**
Under gasket, 1-62

**EMBRITTLEMENT**
Mercury liquid metal, 6-59

**EROSION-CORROSION**
Copper tube systems, 11-57
Coatings for fluidized bed boilers, 2-38

**FAILURE ANALYSIS**
Crevice corrosion, Ti plate heat exchanger, 1-62
Embrittlement, Al plate heat exchanger, 6-59
Plate heat exchangers, 1-59
Sandelin effect on CS brackets in molten Zn, 6-63
SCC, Ti heat exchanger, 1-62
Weld spatter, 2-102

**FATIGUE FAILURE**
Sulfate-reducing bacteria, cause of, 4-40

**GALVANIC CORROSION**
Atmospheric corrosion of metals, 9-55
Corrosion at same-metal couple, 12-63
Corrosion mapping steel-reinforced concrete in a galvanizing atmosphere, 12-26
Failure of concrete roof tiles, 8-73
Galvanic series, 8-70

**GAS**
***See* NATURAL GAS; OIL AND GAS PRODUCTION**

**HEAT EXCHANGERS**
***See also* BOILERS; POWER PLANTS**
Failure of
Al, by mercury liquid metal embrittlement, 6-59
Ti, by SCC, 4-61
Ti plate, by crevice corrosion, 1-62
plate, 1-59

**HYDROGEN SULFIDE**
***See also* ACIDS**
Control methods in amine systems, 1-42

**INSPECTION**
Risk-based, for plant equipment, 7-70

**LININGS**
Pipe, for high-temperature applications, 9-34
Polymide, 3-24
Rubber, material specifications, 7-31

**LIQUID METAL CRACKING**
Mercury, cause of Al plate heat exchanger failure, 6-59

**LOCALIZED ATTACK**
***See also* MICROBIAL ATTACK; PITTING ATTACK**
Behavior of nuclear waste container, 3-54
Understanding and preventing, 12-54

**MARINE ENVIRONMENTS**
***See also* OFFSHORE STRUCTURES, SEAWATER**
Anode consumption on a subsea x-mas tree, 9-17
Blueprint for water quality in S. Louisiana, 6-46
Coating system for cold-weather bridge, 10-43
Hydrogen effects in steel, biological influences, 4-40
Ice shields on the Northumberland Strait Confederate Bridge, CP of, 10-27
Impressed current CP cost for coastal Oregon bridges, 7-22
Intermittent protection with solar power, 12-14
Mixed CP method for corvette-type ship, 7-17

**MATERIALS & DESIGN**
Aluminized steel tubes and pipes, 7-65
Atmospheric corrosiveness maps, 12-48
Common materials in fresh water, effect of Cl on, 11-52
Copper pipe pitting, caused by well water, 11-61
Corrosion and materials technology for deep water, 4-54
Corrosion of
a SS hot water system in a brewery, 5-66
candidate nuclear waste container materials, 3-54
CS under wet insulation, 5-73
SS by hot caustic
Corrosion protection and encapsulation grouts, shear strength of, 6-54
Effect of Cl on, in fresh water, 11-52
Erosion-corrosion limits of alloys, predicting, 9-59
Experience in methanol reformulating units, 5-60
Filiform corrosion on coated steel, 3-67
FRP applications, 3-61
Galvanic atmospheric corrosion of metals, $H_2SO_4$ plants, 9-55
Galvanic corrosion, failure of concrete roof tiles, 8-73
Galvanic corrosion at same-metal couple, 12-63
Galvanic series, 8-70
Gasket materials, influence on crevice corrosion resistance of SS flanges, 8-62
Hydrogen-induced cracking, misconceptions, 10-82
Inspection methodology, 2-89
Failures in plate heat exchangers, 1-59
Mercury liquid metal embrittlement, 6-59
Metal dusting of Ni-based alloys, 7-58
Pipeline rehabilitation by water-jetting, 2-97
Reactive metals, behavior of, 7-69
Reinforced concrete structures, diagnosing, 10-69
Resistance of tantalum and alloys in sulfuric acids, 1-52
Risk-based inspection for plant equipment, 7-70
Sandelin effect on CS brackets in molten Zn, 6-63
Steel corrosion in concrete, probability model, 10-64
Study of pipe cleaning and magnetic particle techniques, 2-84
Technology for deep-water oil and gas production, 4-54
Temperature control during acid cleaning, 4-59
Ti, connecting to other metals, 8-68
Ti plate heat exchanger failure, 1-62, 4-61
Understanding and preventing localized corrosion, 12-54
Weld spatter, 2-102
Welded SS evaporator tubes, failure of, 9-62

**MICROBIAL ATTACK**
***See also* FUNGUS; LOCALIZED ATTACK**
Corrosion of Fe under anaerobic environments, 5-46
Imitating natural fouling control of, 4-45
On-line monitoring of, 2-61
Prevention of, in fire protection systems, 7-45
Sulfate-reducing bacteria, possible source of phosphorous compound, 5-46

**NATURAL GAS**
***See also* OIL AND GAS PRODUCTION**
Alternating current interference related to explosions in piping, 8-17
Cryogenic testing of protective coatings, 3-28
Performance evaluation of metallic thermal spray, 7-31
Pipe liners for high-temperature applications, 9-34
Well tubulars, selecting internal coatings for, 4-28

**NICKEL AND ALLOYS**
Metal dusting of, 7-58

**OFFSHORE STRUCTURES**
***See also* SEAWATER**
Anode consumption on a subsea x-mas tree, 9-17

Coating system for cold-weather bridge, 10-43
CP for above-water sections of intake structure, 6-11
CP revamping technology, 3-15
Ice shields on the Northumberland Strait Confederate Bridge, CP of, 10-27
CP for coastal Oregon bridges, 7-22
Impressed current tensioned anode strings, 4-19
Intermittent protection with solar power, 12-14
Platform, upgrade of, 4-13

**OIL AND GAS PRODUCTION**
***See also* NATURAL GAS**
Aluminized steel piping, welding methods and petrochemical applications, 7-65
Deep-water, materials and corrosion technology, 4-54
Performance evaluation of metallic thermal spray, 7-34
Freeze-proofing biocides, 9-44
Paraffin deposit removal in hydrocarbon production, 9-49
Pipe liners for corrosive high-temperature applications, 9-34
Predicting critical erosion-corrosion limits of alloys, 9-59
Well tubulars, selecting internal coatings for, 4-28

**PAINT**
***See* COATINGS**

**PIPELINES**
Alternating current interference-related explosions in, 8-17
Failure of a potable water main pipeline, 11-47
Flow-induced corrosion of, 3-38
Pressure, coating application, 2-44
Rehabilitation
By water-jetting, 2-97
CP data collection, 1-17
Underground, use of coupons, 2-23
Use of coupons and probes, 8-24

**PIPES**
Aluminized steel, welding methods and petrochemical applications, 7-65
Copper pipe pitting, 11-61
Erosion-corrosion of copper tube systems by domestic waters, 11-57
Failure of welded evaporator tubes, 9-62
Liners for high-temperature oil and gas applications, 9-34
Prestressed, CP of, 11-14

**PITTING ATTACK**
***See also* LOCALIZED ATTACK**
Copper pipe, caused by well water, 11-61
Understanding and preventing, 12-54

**POLYMERICS**
***See also* COMPOSITES**
Advanced lining systems for chemical environments, 8-35
Sulfonated polymers for deposit and corrosion control, 10-56

**POWER PLANTS**
***See also* BOILERS, HEAT EXCHANGERS**
Coating concrete containment structures in, 6-33
Water reuse for electric utility and cogeneration plants, 12-37

**REBAR**
***See* CONCRETE**

**REFINERIES**
***See also* OIL AND GAS PRODUCTION**
Risk-based inspection for plant equipment, 7-70

**RUBBER**
Lining, material specification for, 7-31

**SEAWATER**
***See also* MARINE ENVIRONMENTS; OFFSHORE STRUCTURES**
Hydrogen effects in steel, biological influences, 4-40
Steel-reinforced concrete seawater and intake structure, CP of, 6-11

**SOUR SERVICE**
***See also* ACIDS; HYDROGEN SULFIDE**

**STEELS, CARBON**
Atmospheric corrosiveness maps for, 12-48
Brackets in molten zinc bath, corrosion of, 6-63
Coated, filiform corrosion on, 3-67
Corrosion of, under wet insulation, 5-73

**STEELS, STAINLESS**
Corrosion of, by hot caustic, 1-64
Failure of welded evaporator tubes, 9-62
Hot water system in a brewery, corrosion of, 5-66

**STRESS CORROSION CRACKING**
Study of pipe cleaning and magnetic particle technique, 2-84
Ti heat exchanger failure, caused by, 4-61

**TANKS**
Corrosion from inappropriate construction, 9-20
Hot asphalt storage, CP evaluation probes, 12-21

**TITANIUM AND ALLOYS**
Connecting to other metals, 8-68
Crevice corrosion, Ti plate heat exchanger, 1-62

**WATER, COOLING**
Biocides for biofilm control, 10-50
Effect of MCMI on bacterial respiration, 8-54
Particulate interference and treatment, 3-46
Outsourcing of services, 6-41
Reuse in electric utility and cogeneration plants, 12-37

**WATER, POTABLE**
Copper pipe pitting, 11-61
Corrosion of a brewery SS hot water system, 5-66
Effect of Cl on common materials, 11-52
Erosion-corrosion of copper tube systems, 11-57
Failure of a water main pipeline, 11-47

**WATER, SEA**
***See* SEAWATER**

**WATER TREATMENT**
***See also* BIOCIDES**
Biocide for biofouling control, field performance, 7-50
Cooling water, biofilm control, 10-50
Freeze-proofing, 9-44
Particulate interference, 3-46
Silica scale control, 11-41

**WELDS AND WELDMENTS**
Aluminized steel piping, welding methods and petrochemical applications, 7-65
Failure of evaporator tubes, 9-62
Weld spatter, 2-102

**ZINC AND ALLOYS**
Zn sheet anodes for CP, 1-12

**Access the NACE KnowledgeBase at www.nace.org for a comprehensive record of corrosion control and technologies worldwide. This free service features the following resources:**

- **Author and title indexes to more than 4,000 *MP* articles published since 1962.**
- **Author and title indexes to more than 7,400 articles in *CORROSION* journal since 1945, and more than 620 full-text articles.**
- **Author and title indexes to more than 10,500 NACE Annual Conference papers since 1968.**
- **Many other resources, including a glossary of corrosion-related terms.**
